

Motorcycle Brake Disc with Slotted Rotor

This high-performance motorcycle brake disc provides superior stopping power and heat dissipation. Its lightweight construction improves handling, while durable materials ensure long-lasting performance.

Product Overview

High-Performance Braking Solution

This motorcycle brake disc is engineered for superior stopping power and consistent performance under demanding conditions. Featuring a precision-slotted rotor surface, it enhances friction while effectively managing heat to reduce brake fade. Its lightweight construction is designed to improve overall handling, making it an ideal upgrade for riders seeking both safety and efficiency.

Technical Specifications

Durability

Long-lasting • High-Performance

Rotor Design

Slotted

Key Performance Benefits

Enhanced Friction, Reduced Brake Fade, Heat Dissipation, Lightweight Construction

Compatibility

Fitment Compatibility

Engineered for precise fitment across a range of motorcycle models.
