

Motorcycle Brake Drum Assembly

This motorcycle brake drum assembly is designed for efficient braking performance. It features a cast aluminum construction with integrated brake lever actuator and mounting points.

Product Overview

High-Performance Brake Drum Assembly

This motorcycle brake drum assembly is engineered for reliable and efficient braking performance. Constructed from durable cast aluminum, it features an integrated brake lever actuator and precise mounting points for wheel spokes. Designed specifically for the WY125 model, this assembly comes complete with internal brake shoes and necessary hardware, ensuring a straightforward installation and consistent stopping power.

Technical Specifications

Included Components

- Brake shoes
- Brake lever actuator
- Mounting hardware
- Drum housing

Application

Motorcycle • Braking System

Model Compatibility

WY125

Material

Cast Aluminum
