

Motorcycle Cast Aluminum Wheel

This cast aluminum motorcycle wheel is designed for durability and performance. Its multi-spoke design ensures optimal strength and weight distribution.

Product Overview

High-Performance Cast Aluminum Wheel

This cast aluminum motorcycle wheel is engineered for a balance of durability and performance. It features a robust multi-spoke design that ensures optimal weight distribution and structural integrity. Precision-engineered for a secure tire fit, this wheel enhances handling and acceleration while maintaining compatibility with standard motorcycle axles and braking systems.

Design & Construction

Material	Cast Aluminum
Spoke Configuration	Multi-spoke
Finish	Silver Rim, Black Spokes

Compatibility & Features

Key Features

- Standard axle compatibility
- Compatible with standard braking systems
- Precision-engineered rim profile
- Lightweight construction
