

Motorcycle Clutch Assembly

High-performance clutch assembly designed for optimal power transfer and durability. Features include friction plates, steel plates, a clutch basket, and pressure plate, engineered for smooth engagement and reliable operation in demanding conditions.

Overview

High-Performance Clutch Assembly

This high-performance clutch assembly is engineered for optimal power transfer and long-term durability in motorcycle applications. It features a comprehensive set of components, including friction plates, steel plates, a clutch basket, and a pressure plate. Designed for smooth engagement and reliable operation, this assembly is built to perform consistently even in demanding riding conditions.

Technical Details

Included Components

- Friction plates
- Steel plates
- Clutch basket
- Pressure plate

Application

Motorcycle

Performance

Key Benefits

Smooth Engagement • High Power Transfer • Durable Construction
