

# Motorcycle Clutch Assembly

This motorcycle clutch assembly is designed for engaging and disengaging the engine from the transmission. It consists of a clutch basket, center hub, clutch plates, pressure plate, and springs to ensure efficient power transmission.

## Overview

### High-Performance Clutch Assembly

This motorcycle clutch assembly is engineered for reliable power transmission, serving as the critical link between the engine and the transmission. The complete kit includes a precision-machined clutch basket, center hub, pressure plate, and durable springs, ensuring smooth engagement and disengagement. Designed for durability and consistent performance, this assembly is an essential component for maintaining optimal motorcycle drivetrain operation.

## Technical Details

### Included Components

- Clutch basket with external gear teeth
- Clutch center hub
- Clutch plates
- Pressure plate
- Clutch springs

### Core Function

Engaging and disengaging engine power to the transmission

## Design Features

### Design Features

External gear teeth basket, Transmission input shaft compatibility, Spring-loaded pressure system
