

Motorcycle Clutch Assembly for Yamaha 250

This clutch assembly is designed for Yamaha 250 motorcycles. It provides reliable power transfer and is essential for optimal motorcycle performance.

Product Overview

Yamaha 250 Clutch Assembly

This high-performance clutch assembly is specifically engineered for Yamaha Majesty 250 and Nmax 250 motorcycle models. The system comprises a precision-engineered primary drive face, a driven face, and a robust clutch bell. Engineered for reliability, the assembly ensures optimal power transfer and consistent engagement, making it an essential component for maintaining peak engine performance.

Technical Details

Model Compatibility

- Yamaha Majesty 250
- Yamaha Nmax 250

Key Performance Attributes

- Heat dissipation cooling fins
- Smooth engagement driven face
- Reliable power transfer

Component Materials

Durable Steel Clutch Bell, Cooling-fin Primary Drive Face
