

Motorcycle Clutch Assembly with Variator and Fan

This clutch assembly appears to be a component for a scooter or small motorcycle. It consists of several parts including a variator, fan, and clutch bell.

Product Overview

High-Performance Clutch Assembly

This comprehensive clutch assembly is engineered for optimal power transmission in scooters and small motorcycles. The unit integrates a variator, cooling fan, and clutch bell into a single, cohesive system designed to ensure smooth gear ratio transitions and efficient engine cooling. It is a critical component for maintaining reliable drivetrain performance.

Technical Specifications

Included Components

- Variator
- Cooling Fan
- Clutch Bell
- Clutch Shoes

Model Compatibility

QJ50T

Application

Scooter, Small Motorcycle
