

Motorcycle Clutch Friction Plate for CJ90

This motorcycle clutch plate is designed for CJ90 models. It has a 3.55mm thickness and 110mm outer diameter.

Product Overview

High-Performance Clutch Friction Plate

This motorcycle clutch friction plate is engineered for optimal performance and durability, ensuring smooth power transmission and reliable engagement. Featuring a robust construction with high-friction A-class rubber and cork-based materials, it provides excellent heat and wear resistance. The precision-cut friction segments enhance grip and reduce slippage, contributing to improved acceleration and an extended lifespan for your motorcycle's clutch system.

Technical Specifications

Outer Diameter	110mm / 95.5mm
Inner Diameter	70.2mm / 63.5mm
Thickness	3.55mm / 2.75mm
Material Composition	A-class rubber and cork-based material

Compliance & Compatibility

Certifications

ISO/TS16949
