

Motorcycle Clutch Friction Plate for DT100

This motorcycle clutch plate is specifically designed for DT100 models. It features a 3.75mm thickness and a 124mm outer diameter for optimal fitment.

Product Overview

High-Performance Clutch Friction Plate

This motorcycle clutch friction plate is engineered for optimal power transfer and durability in motorcycle clutch systems. Featuring a composite friction material bonded to a steel core, it ensures reliable performance under demanding conditions. The plate is precision-machined to meet OEM specifications for fit, function, high friction coefficient, heat resistance, and wear resistance.

Technical Specifications

Outer Diameter	124 mm
Inner Diameter	100 mm
Thickness	3.75 mm
Material	A-class rubber and cork-based material

Compliance & Standards

Certifications	ISO/TS16949
----------------	-------------

Compatibility

Compatible Models
