

Motorcycle Clutch Friction Plate for FZ16

This motorcycle clutch plate is specifically designed for FZ16 models. It ensures efficient power transfer and smooth engagement for an enhanced riding experience.

Product Overview

High-Performance Clutch Friction Plate

This clutch friction plate is engineered specifically for the FZ16 motorcycle model, ensuring optimal power transfer and smooth engagement. Built with high-strength ADC-12 aluminum and advanced, environment-friendly friction materials, it offers reliable performance under demanding riding conditions. Designed for durability, this component effectively minimizes noise and wear, making it an ideal choice for restoring or maintaining your motorcycle's clutch system efficiency.

Technical Specifications

Performance Features

- Stable braking performance
- Low wear rate
- Low noise operation
- Environment-friendly friction material

Construction Material

ADC-12 Aluminum

Compliance & Quality

Certifications

ISO/TS16949, ISO14001, RoHS, SGS
