

Motorcycle Clutch Friction Plate

This motorcycle clutch plate is designed for SRZ150 models. It features a 3.05mm thickness and a 125mm outer diameter.

Product Overview

High-Performance Clutch Friction Plate

This high-performance clutch friction plate is engineered for optimal friction and heat resistance, ensuring smooth and reliable power transfer. Manufactured with durable A-class rubber and cork-based materials, it is designed for an extended lifespan and consistent performance under demanding conditions. Precision-engineered to meet or exceed OEM specifications, this component is a reliable choice for maintaining motorcycle drivetrain integrity.

Physical Dimensions

Outer Diameter	125 mm
Inner Diameter	95 mm
Thickness	3.05 mm

Material & Quality

Certifications ISO/TS16949	
Material Composition	A-class rubber and cork-based material

Compatibility

Compatible Models

- CG125
- CG150
- GS125
- GN125
- RX125
- RS100
- YB100
- AX100
- CY80
- Y110
- GN250
- JH70
- BOXER
- PULSAR
- CJ90
