

Motorcycle Coil-Over Shock Absorber

This motorcycle shock absorber provides superior damping and ride comfort. Its coil-over spring design enhances load capacity and responsiveness.

Product Overview

High-Performance Suspension Solution

These motorcycle coil-over shock absorbers are engineered for superior damping and enhanced ride comfort across various riding conditions. Featuring a robust coil-over spring design, they provide increased load capacity and improved responsiveness for a smoother handling experience. Built with durable, wear-resistant materials, these units are designed to deliver long-lasting performance for diverse motorcycle models.

Technical Specifications

Design Type	Coil-Over
Key Performance Features	Superior Damping, High Load Capacity, Enhanced Responsiveness, Wear Resistant
Application Scope	Suitable for various motorcycle models and riding conditions
