

Motorcycle Coil-Over Shock Absorber

This motorcycle shock absorber provides superior ride comfort and handling. It features a coil-over spring design to optimize suspension performance.

Product Overview

High-Performance Suspension Solution

This coil-over shock absorber is engineered to provide superior ride comfort and handling for a wide range of motorcycle models. Designed for durability and consistent performance, it serves as an ideal upgrade for enhancing stability and control. The robust construction ensures long-lasting reliability, delivering a smoother and safer riding experience for professional and recreational applications.

Performance Metrics

Maximum Load Capacity

150 kgs
Max Load

Technical Details

Model Identifier	BT-44
Country of Origin	China

Features

Key Features	Coil-over design, Enhanced stability, Improved handling, Durable construction
