

Motorcycle Complete Engine Assembly

Complete engine assemblies for motorcycles are available in 150cc and 180cc configurations. These units feature a robust crankcase, reliable transmission components, and a durable cylinder head.

Overview

High-Performance Engine Assembly

This complete motorcycle engine assembly is engineered for durability and consistent performance across diverse riding conditions. It features a robust crankcase, reliable transmission components, and a precision-engineered cylinder head to ensure longevity. Available in two distinct configurations, it offers flexibility for various motorcycle models and power requirements.

Technical Specifications

Available Engine Models

- 150cc (LK157QMJ)
- 180cc (LK162QMK)

Key Performance Metrics

150 cc

Displacement Option A

180 cc

Displacement Option B

Component Dimensions

Metric	Value
Engine Type Identifier	1.4
Series Identifier	21
Model Code	97
Variant L8	8
Variant L4	4
Internal Spec 1	125
Internal Spec 2	100
Internal Spec 3	175
Internal Spec 4	310

Build Features

Robust Crankcase, Reliable Transmission, Durable Cylinder Head
