

Motorcycle Cylinder Honing Machine

This honing machine is designed for the precise finishing of motorcycle cylinders. It ensures optimal cylinder geometry and surface finish, which contributes to improved engine performance and longevity.

Product Overview

Precision Cylinder Honing Solution

This versatile honing machine is engineered for the precise finishing of cylinders in automotive, light truck, motorcycle, marine, and small engine applications. It is designed to ensure optimal cylinder geometry and surface finish, which directly contributes to improved engine performance and longevity. With its robust construction and precise control mechanisms, this equipment is suitable for both professional production environments and engine reconditioning workshops.

Applications

Compatible Engine Types

Automotive, Light Truck, Motorcycle, Marine, Small Engine

Technical Specifications

Standard Honing Heads

40 mm

MFQ40 Range Min

60 mm

MFQ40 Range Max

Optional Honing Heads

- MFQ60 (60-80mm)
- MFQ80 (80-120mm)

Included Accessories

Standard Equipment

- 1x Special Micrometer
- Support Kits
- 5x Centering Rods

Tooling Dimensions

Component	Specification
Tool Holder	36-61mm and 60-85mm
Boring Cutter	23mm and 32mm
