

Motorcycle Drive Belt

This motorcycle drive belt is made with chloroprene rubber and gumming polyester. It provides steady tensile force, reliable drive, and great power.

Product Overview

High-Performance Drive Belt

This motorcycle drive belt is engineered for optimal power transmission and long-term durability in demanding riding conditions. Constructed using advanced chloroprene rubber and reinforced with gumming polyester, it provides steady tensile force and consistent drive performance. The precision-engineered tooth profile ensures smooth engagement and significantly reduced slippage, making it a reliable replacement part for a wide range of motorcycle models.

Technical Specifications

Performance Features

- Steady tensile force
- Steady drive performance
- High power transmission efficiency
- Heat resistance

Construction Material

Chloroprene Rubber, Gumming Polyester

Service & Logistics

OEM Services

Yes

Packaging

Neat and professional packaging provided according to client requirements
