

Motorcycle Drive Chain and Sprocket Kit

This motorcycle transmission kit includes a drive chain, front sprocket, and rear sprocket. It is designed for replacing worn or damaged transmission components on motorcycles.

Product Overview

High-Performance Drive Chain & Sprocket Kit

This comprehensive motorcycle transmission kit provides a complete solution for drivetrain maintenance and performance restoration. Engineered for reliability, the kit includes a precision-machined front sprocket, a high-durability rear sprocket, and a high-strength roller drive chain. Utilizing advanced heat treatment and galvanized finishing, these components are designed to withstand high operational stress and resist environmental corrosion.

Technical Specifications

Component Configuration

Component	Material	Treatment
Front Sprocket	45 Steel	Heat Treatment / Galvanized
Rear Sprocket	A3 Steel	High-Frequency Heat Treatment / Galvanized
Drive Chain	Industrial Grade	Zinc Plated

Drive Metrics

428 Chain Size	122 Links Chain Length	14 T Front Sprocket	44 T Rear Sprocket
