

Motorcycle Drive Chain and Sprocket Kit

This motorcycle transmission kit includes a drive chain, a large driven sprocket, and a smaller drive sprocket. The sprockets feature precision-cut teeth to ensure optimal chain engagement and efficient power transfer.

Product Overview

Professional Drivetrain Transmission Kit

This high-performance motorcycle drive chain and sprocket kit is engineered for reliable power transmission and extended durability. Featuring heat-treated 45 steel for the front sprocket and resilient A3 steel for the rear, the system ensures optimal engagement and wear resistance. Each component is finished with a galvanized surface treatment to resist corrosion and ensure longevity in various riding conditions.

Technical Specifications

Front Sprocket Material	45 Steel
Rear Sprocket Material	A3 Steel
Surface Treatment	Galvanized, Heat Treated, High Frequency Heat Treated

Drivetrain Configuration

Sprocket Configuration

15 T Front Teeth	38 T Rear Teeth
