

Motorcycle Drive Sprocket

This motorcycle drive sprocket is designed for optimal chain engagement and efficient power transmission. Constructed from a durable steel alloy, it offers extended wear resistance and reliable performance for various motorcycle models.

Product Overview

High-Performance Drive Sprocket

This metallic drive sprocket is engineered for motorcycle drive systems, focusing on power transmission and reliability. It features precision-cut teeth that ensure optimal chain engagement for smoother operation. Constructed from a durable steel alloy, the component offers extended wear resistance, making it a dependable choice for various motorcycle models and drivetrain applications.

Technical Specifications

Material	Steel alloy
Key Features	Precision-cut teeth, Wear resistant, Durable construction
Compatibility	Suitable for various motorcycle models and drivetrain applications
