

Motorcycle Drive Sprocket

This motorcycle drive sprocket ensures optimal power transfer. It is precision-engineered for reliable performance and extended lifespan.

Product Overview

Professional Grade Drive Sprocket

The TM125-5 sprocket is a precision-engineered component designed to provide reliable performance and smooth operation for motorcycle drive systems. Built for durability, it ensures optimal power transfer between the engine and the wheel. This high-quality part is an ideal choice for both routine maintenance replacements and performance upgrades.
