

Motorcycle Drive Sprocket 428

This motorcycle sprocket is designed for use with a 428 chain. It plays a crucial role in transferring power from the engine to the wheel through the drive chain.

Product Overview

Precision Engineered Drive Sprocket

This 428-series motorcycle drive sprocket is precision-engineered for reliable power transfer and durability. Featuring a robust metallic construction with optimized weight-reduction cutouts, it ensures efficient performance while maintaining structural integrity. Designed for standard 428 chain compatibility, this component is an ideal choice for maintenance and performance upgrades in motorcycle drivetrain systems.

Technical Specifications

Compatibility

428 Chain

Chain Compatibility

428

Material

High-grade metal (Steel/Aluminum)

Design Features

Weight reduction cutouts, Precision-cut teeth, Standard mounting hole
