

Motorcycle Drivetrain Kit with Chain and Sprockets

This motorcycle drivetrain kit includes a drive chain, a rear sprocket, and a front sprocket. The components are made from steel and the chain is a roller chain type.

Product Overview

High-Performance Drivetrain Kit

This comprehensive motorcycle drivetrain kit is engineered for durability and reliable power transmission. It features a robust roller chain paired with high-quality steel front and rear sprockets. Each component undergoes advanced heat treatment and galvanizing processes to ensure long-lasting wear resistance and consistent performance under various operating conditions.

Technical Specifications

Material Specifications

Component	Material	Treatment
Front Sprocket	Top 45 Steel	Heat Treatment, Galvanizing
Rear Sprocket	A3 Steel	High Frequency Heat Treatment, Galvanizing
Chain	20Crni Steel	Heat Treatment

Key Features

Roller Chain Type, Galvanized Finish, High-Frequency Hardened, Drivetrain Replacement
