

Motorcycle Drum Brake Assembly

This motorcycle drum brake assembly is designed for either the front or rear wheel. It features a cast aluminum housing, brake lever arm, internal brake shoes, and a brake wear indicator.

Product Overview

High-Performance Drum Brake Assembly

This motorcycle drum brake assembly is engineered for reliable stopping power and consistent performance. Designed as a single leading shoe system, it features a durable cast aluminum housing for optimal heat dissipation and structural integrity. The assembly comes fully equipped with essential hardware, including an integrated brake wear indicator, making it a robust solution for maintenance and replacement needs.

Technical Specifications

Brake System Type	Single Leading Shoe
Housing Material	Cast Aluminum
Finish	Silver
Compatibility Model	AX100

Features

Included Components

- Cast aluminum housing
- Brake lever arm
- Internal brake shoes
- Brake wear indicator
- Mounting hardware
