

Motorcycle Drum Brake Shoes

High-performance drum brake shoes designed for motorcycle braking systems. These brake shoes provide reliable and consistent stopping power under various riding conditions.

Product Overview

High-Performance Braking Solution

These high-performance drum brake shoes are engineered to provide reliable and consistent stopping power for motorcycle braking systems. Featuring a durable friction material bonded to a sturdy metal backing plate, they offer excellent heat dissipation and reduced brake fade for safer riding. Designed for optimal fit and easy installation, they are an ideal replacement for worn or damaged components to maintain system integrity.

Technical Specifications

Key Performance Features

- Consistent stopping power
- Excellent heat dissipation
- Reduced brake fade
- Optimized fit for easy installation

Compatibility	CG125
Construction	Durable Friction Material, Metal Backing Plate

Application

Primary Use

Replacement Part • Motorcycle Braking System
