

Motorcycle Dual Muffler Exhaust System

This motorcycle exhaust system features a dual muffler design. The system is engineered to reduce noise and enhance engine performance for specific motorcycle models.

Product Overview

Dual Muffler Exhaust System

This motorcycle exhaust system features a dual muffler design engineered for optimal gas flow and noise reduction. The structure includes a black-coated pipe with two silver-colored cylindrical mufflers, specifically designed for precise fitment and enhanced engine performance. Its bent pipe geometry ensures efficient installation and improved exhaust management for compatible motorcycle models.

Design & Construction

Key Design Features

- Dual muffler configuration
- Optimized bent pipe geometry
- Engineered for noise reduction
- Performance-oriented gas flow

Number of Mufflers	2
Finish	Black-coated pipe, Silver-colored mufflers

Compatibility

Fitment	Designed for specific motorcycle models to ensure precise fitment.
