

# Motorcycle Electric Fuel Pump

This electric fuel pump is designed for motorcycles. It delivers fuel from the fuel tank to the engine's fuel injection system or carburetor, ensuring consistent fuel supply.

## Product Overview

### High-Performance Motorcycle Fuel Delivery

This electric fuel pump is engineered to provide a reliable and consistent fuel supply to motorcycle engines. Designed as a positive displacement pump, it ensures optimal performance for both fuel injection systems and carburetors under varying engine loads. Its compact, durable construction allows for seamless integration and installation across a wide range of motorcycle models.

## Technical Specifications

### Rated Voltage

**12 V**

Operating Voltage

### Design Features

- Cylindrical metal housing (steel/aluminum)
- Positive displacement mechanism
- Compact form factor
- Integrated electrical connection wires

### Fuel Compatibility

Gasoline, Standard Motorcycle Fuels

### Installation

Universal fitment for various motorcycle models
