

Motorcycle Engine Assembly, 649cc, Liquid-Cooled

This motorcycle engine assembly is liquid-cooled with a displacement of 649cc. It is designed to deliver strong mid-range torque and smooth power.

Overview

High-Performance 649cc Assembly

This liquid-cooled, parallel-twin engine is engineered for motorcycle applications requiring a precise balance of power and efficiency. Featuring advanced intake and exhaust port optimization alongside electronic fuel injection, the assembly delivers strong mid-range torque and smooth responsiveness. Its robust construction and lightweight piston design ensure high-performance reliability under demanding riding conditions.

Technical Specifications

Displacement

649 cc

Engine Capacity

Cooling System

Liquid-Cooled

Fuel Delivery

Electronic Fuel Injection (EFI)

Transmission

6 Speeds

Features

Performance Profile

- Strong mid-range torque
- Smooth power delivery
- Optimized intake and exhaust ports
- Robust lubrication system

Key Features

Parallel-Twin, Electric Starter, Lightweight Components, Emissions Compliant
