

Motorcycle Engine Assortment

These air-cooled, single-cylinder motorcycle engines are commonly used in smaller motorcycles and scooters. The assortment includes variations in engine displacement and design.

Overview

Versatile Motorcycle Engine Assortment

This assortment features a diverse collection of single-cylinder, air-cooled engines designed for small-displacement motorcycles and scooters. Engineered for reliability and ease of maintenance, these units serve as ideal solutions for replacement, repair, or upgrade projects. The range includes various configurations to accommodate different model requirements, ensuring broad compatibility across common light motorcycle platforms.

Technical Specifications

Available Engine Models

Model Identifier	Variant Type
DW157FMI	Suzuki-style
DW157FMI	Standard
DW150FMI	Biaofeng-style
DW162FMG	TBT-style
DW1P53FMH	Standard
DW1P53FMH	Thai-Honda style

Cooling System	Air-cooled
