

Motorcycle Engine Crankshaft

This high-performance crankshaft is designed for motorcycle engines. It features precision machining, durable materials, and balanced construction for smooth operation and extended engine life.

Product Overview

High-Performance Motorcycle Crankshaft

This high-performance crankshaft is engineered specifically for motorcycle engines, designed to withstand high stress while providing optimal operational performance. Featuring precision machining and durable construction, it ensures smooth engine operation and extended component lifespan. It serves as an ideal solution for both OEM replacement needs and engine performance upgrades.

Compatibility

Compatible Models

- CG125
- CG150
- CG200
- GY6-125
- GY6-150
- YBR125
