Product Overview

High-Performance Cylinder Kit

This motorcycle cylinder kit is engineered for reliable engine performance and efficient combustion. Designed with precision-machined components, the kit includes the cylinder block, piston, rings, wrist pin, and circlips for a comprehensive replacement or upgrade solution. The cylinder block features integrated cooling fins to ensure optimal heat dissipation and engine longevity.

Technical Specifications

Displacement	124 cm3
Material	Aluminum alloy
Key Features	Cooling fins, Precision-machined bore, Optimal compression

Kit Components

Included Components

- Cylinder block
- Piston
- Piston rings
- Wrist pin
- Circlips
