

Motorcycle Engine Housing Cover

This motorcycle part is an engine housing cover. It is made of a light-colored metal alloy and features a circular design with multiple bolt holes.

Product Overview

Precision-Engineered Motorcycle Component

This motorcycle engine housing cover is designed for durability and precise fitment within the engine or drivetrain assembly. Crafted from high-quality, lightweight alloy, it provides robust protection for internal components while maintaining optimal thermal management. Its circular design and integrated housing features ensure seamless installation and compatibility with standard motorcycle engine configurations.

Technical Specifications

Design Features

- Circular housing geometry
- Multi-point bolt mounting system
- Integrated side housing component
- Corrosion-resistant finish

Mounting Configuration

Bolt-on • OEM Compatible

Material Composition

Lightweight Aluminum Alloy

Application Area

Engine, Drivetrain, Motorcycle
