

Motorcycle Engine Piston Kit

This motorcycle piston features high-strength aluminum alloy, offering resistance to high temperatures and pressure for durability. The kit includes the piston, piston rings, wrist pin, and circlips for a single piston setup.

Product Overview

High-Performance Engine Component

This motorcycle engine piston kit is engineered from high-strength aluminum alloy, specifically designed to withstand the rigorous demands of high-temperature and high-pressure environments. The components feature homogenized quality to ensure consistent, reliable engine operation and lightweight performance. Each kit is precision-engineered to support optimal combustion efficiency and long-term durability.

Technical Specifications

Surface Coating

Tin Coating

Material

High-strength aluminum alloy

Compatible Model

Bajaj STD++

Kit Contents

Included Components

- Piston
- Piston Rings
- Wrist Pin
- Circlips

Quantity

1 Set (Single Piston)

Performance Features

Performance Highlights

High Temperature Resistant, High Pressure Resistant, Lightweight, Homogenized Quality
