Product Overview

Engine Protection Solutions

These motorcycle engine protective covers are engineered to shield vital engine components from impacts, road debris, and environmental elements. Designed for durability and performance, the covers feature integrated mounting points for a secure and straightforward installation process. They are available in various material compositions, including lightweight alloy and durable plastic, to suit different motorcycle models and protection requirements.

Key Features

Target Markets

Colombia, Peru, Brazil, Argentina, Bolivia, Guatemala, Uruguay, Paraguay, India, Bengal, Algeria

Technical Specifications

Construction Materials

- Lightweight Alloy
- Durable Plastic

Design Features

Geometric Cutouts • Ventilation Openings • Corrosion Resistant • Lightweight

Part Number

1N2345
