

Motorcycle Engine Side Cover for CG125

This metallic side cover is designed for CG125 motorcycle engines. Constructed from cast aluminum alloy, it shields engine components and offers a clean appearance.

Product Overview

Engine Protection for CG125

This motorcycle engine side cover is a precision-engineered replacement part specifically designed for the CG125 engine model. Constructed from durable cast aluminum, it provides essential protection for the engine's rotating mechanisms against debris and environmental elements. The component offers a clean, finished aesthetic, making it an ideal choice for maintenance, restoration, or aftermarket upgrades.
