

# Motorcycle Engine Valve Rocker Arm

This motorcycle valve rocker arm transfers motion from the camshaft to the valves. Constructed from robust materials, it withstands high stress and temperatures for extended service life and reliable operation.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Valve Rocker Arms

These motorcycle engine valve rocker arms are precision-engineered to facilitate efficient motion transfer from the camshaft to the valves, ensuring optimal engine timing and combustion. Constructed from robust, high-durability materials, they are designed to withstand high stress and extreme operating temperatures. These components serve as a reliable direct replacement, restoring engine responsiveness, power, and overall performance for a wide range of motorcycle models.

## Compatibility & Applications

### Supported Motorcycle Models

- FAZER 150
- XTZ CROSSER 150
- BIZ 125 (2011 onwards)
- CG 160
- 125CC CG/CDI Engines

### Global Market Availability

Colombia, Peru, Brazil, Argentina, Bolivia, Guatemala, Uruguay, Paraguay, India, Bangladesh, Algeria

## Technical Specifications

### Quality Certifications

ISO 9001:2000 • Original Equipment Quality

### Component Details

Feature	Specification
Part Type	Rocker Arm (Without Shaft)
Quantity	1 Set
Engine Compatibility	125CC CG/CDI
