

Motorcycle Exhaust Gasket

This circular metal gasket is designed for motorcycle exhaust systems. It creates a tight seal between mating surfaces in the engine or exhaust, preventing leaks.

Product Overview

High-Performance Exhaust Sealing

This motorcycle exhaust gasket is engineered to provide a reliable, leak-free seal between mating surfaces in the exhaust system. Constructed from durable, corrosion-resistant metal, it ensures optimal engine performance and exhaust flow efficiency. The precision-engineered design features four mounting tabs for secure installation, making it an essential component for maintenance and repair applications.

Technical Specifications

Material Composition	Corrosion-resistant stainless steel
Mounting Points	4 tabs
Key Features	High-temperature resistance, Corrosion-resistant, Precision fit, Durable construction
Application	Motorcycle exhaust system
