

Motorcycle Front and Rear Sprocket Set 38T

This motorcycle sprocket set includes both front and rear sprockets. The rear sprocket features a 38-tooth configuration, precision-machined for optimal chain engagement and power transfer.

Product Overview

High-Performance Drivetrain Components

This premium front and rear sprocket set is engineered for optimal power transfer and drivetrain efficiency. Featuring a precision-machined 38-tooth rear sprocket, the set ensures seamless chain engagement and smooth operation. Built from durable, high-strength materials, these components are designed to withstand significant torque and provide long-lasting reliability for various motorcycle models.
