Product Overview

High-Performance Front Fork Suspension

These motorcycle front fork shock absorbers are engineered to provide superior damping, stability, and control for various motorcycle models. Designed as a hydraulic telescopic system, they offer robust support and consistent performance during operation. Their durable metal alloy construction ensures longevity, while the integrated mounting points allow for efficient installation and seamless integration into front suspension systems.

Compatibility

Compatible Motorcycle Models

AX100, ECO100, CG125, GY6, AKT125, 110-2, BOXER100

Technical Details

Finishing Options

- Grey upper tube
- Chrome lower tube
- Silver finish
- Black cylinder

System Design

Hydraulic Telescopic Fork

Material Composition

Durable metal alloy
