

Motorcycle Front Fork Shock Absorber

Motorcycle front fork shock absorbers featuring a telescopic design. These hydraulic dampers absorb impacts and vibrations to provide a smooth and controlled ride.

Product Overview

High-Performance Front Fork Shock Absorber

This motorcycle front fork shock absorber is engineered to deliver superior handling and impact absorption. Featuring a robust telescopic design with a distinctive gold-colored outer tube and a silver-colored inner rod, it provides both aesthetic appeal and functional reliability. These hydraulic dampers are essential for maintaining a smooth, controlled ride across various road conditions, making them a critical component for motorcycle suspension systems.

Technical Specifications

Component Type	Front Fork Shock Absorber
Design Style	Telescopic
Damping Mechanism	Hydraulic

Aesthetics

Color Scheme	Gold (Outer Tube), Silver (Inner Rod)
--------------	---------------------------------------

Application

Primary Use	Motorcycle suspension system
-------------	------------------------------
