Product Overview

Halley Spring Fork System

The Halley spring fork is a motorcycle front suspension system engineered for a smooth and controlled ride experience. Featuring a dual spring design with integrated dampers, this component effectively absorbs shocks and vibrations on the road. Constructed from high-strength metal and aluminium, it offers both durability and reliability for various motorcycle builds.

Technical Specifications

Design Features

- Dual spring design
- Integrated dampers
- Corrosion-resistant finish

Finish

Black Finish

Material Composition

Metal, Aluminium

Color Availability

Customizable
