

Motorcycle Fuel Delivery Pump

This compact fuel pump is designed for motorcycle engines. It delivers fuel from the fuel tank to ensure consistent engine performance.

Product Overview

High-Performance Fuel Delivery

This motorcycle fuel delivery pump is engineered for efficient fuel transfer from the tank to the engine. Featuring a robust cylindrical metal housing and a precision-molded plastic outlet nozzle, it is built to withstand the demands of motorcycle fuel systems. The unit includes a standard two-wire electrical connector, ensuring straightforward installation and reliable operation.

Technical Specifications

Housing Material	Metal
Outlet Material	Plastic
Electrical Interface	2-Wire Connector
Design Features	Cylindrical Housing, Fuel Delivery System, Compact Design
