

Motorcycle Fuel Tank

This motorcycle fuel tank is designed with a filler neck, mounting brackets, and ports for fuel lines and sensors. The glossy black finish of the tank provides corrosion resistance and enhances its aesthetic appeal.

Overview

High-Performance Motorcycle Fuel Tank

This durable motorcycle fuel tank is engineered for reliability and seamless integration with modern fuel injection systems. Featuring a high-quality glossy black finish, it provides excellent corrosion resistance while maintaining a sleek, professional aesthetic. The design includes precision-engineered mounting brackets and essential ports for fuel lines and emission control devices, ensuring a secure and compliant installation.

Technical Specifications

Included Components

- Filler neck
- Mounting brackets
- Fuel line ports
- Sensor ports

Finish Benefits

Corrosion Resistant • Glossy Finish

Material & Finish

Metal with glossy black coating

Compatibility Features

Fuel Injection Ready, Emission Control Compatible
