Product Overview

Reliable Fuel Flow Control

This fuel tank shutoff valve is engineered for motorcycles and various small engine applications, serving as a critical component for controlling fuel flow from the tank to the carburetor. Constructed with durable metal, it ensures consistent performance and longevity under standard operating conditions. The design includes a simple, intuitive on/off lever for easy operation and an angled outlet to facilitate straightforward fuel line installation.

Technical Specifications

Design Features

- Simple on/off lever operation
- Angled outlet for easy fuel line connection
- Universal compatibility with various tank sizes

Material	Durable Metal
Compatible Applications	Motorcycles, Small Engines
Model Identification	950-11
