

Motorcycle Gear Set with Plastic Ring and Spur Gears

This motorcycle gear set includes a ring gear and a spur gear. These gears are made of white plastic, suitable for gear reduction or power transmission systems.

Product Overview

Precision Engineered Gear Set

This gear set features a high-quality plastic ring gear and a matching spur gear, designed for efficient power transmission in motorcycle and mechanical systems. The use of durable, lightweight plastic provides self-lubricating properties, making it an excellent choice for compact gear reduction applications. These components are engineered for reliable performance and smooth operation in various mechanical assemblies.

Technical Details

Components Included

- Ring Gear
- Spur Gear

Applications

Motorcycle Components • Gear Reduction Systems • Power Transmission

Material

Plastic

Key Features

Lightweight, Self-lubricating, Internal Teeth, External Teeth
