

Motorcycle Gearbox

This gearbox is designed for motorcycles, providing efficient power transmission. It ensures smooth gear changes and reliable performance on the road.

Overview

High-Performance Motorcycle Gearbox

This motorcycle gearbox is engineered for durability and smooth power delivery, designed to meet the rigorous demands of cruiser-style motorcycles. Built with precision mechanical components, it ensures reliable shifting and consistent performance across various riding conditions. This unit is an essential component for maintaining optimal drivetrain efficiency and extending the operational life of your motorcycle.

Compatibility

Compatible Models	JH125-12
Series Identifier	JEDA

Technical Specs

Component Type
Transmission • Gearbox
