

Motorcycle GPS Navigation System

This is a GPS navigation system designed for motorcycles. It provides reliable navigation and real-time tracking.

Overview

Advanced Navigation for Motorcyclists

This Motorcycle GPS Navigation System is designed to provide reliable and accurate routing for riders in various environments. Engineered for durability and ease of use, it integrates seamlessly into the motorcycle dashboard to ensure riders stay on course during daily commutes or long-distance travel. The system prioritizes clear visibility and intuitive operation, making it an essential tool for professional and recreational motorcyclists alike.

Technical Specifications

Device Category	Motorcycle GPS Navigation System
Compatibility	Motorcycle, Commuter, Utility
Weatherproof Design	Yes
Mounting Style	Handlebar Mount

Key Features

System Capabilities

- Turn-by-turn navigation
- High-contrast display for daylight visibility
- Vibration-resistant construction
- Glove-friendly touchscreen interface

Performance Highlights

5 inches

Screen Size

12 V

Operating Voltage
