

Motorcycle Handlebar Control Switch Assembly

Motorcycle handlebar switch assembly featuring a brake lever, turn signal switch, headlight control, and kill switch. It includes a wiring harness with multi-pin connectors for straightforward installation on different motorcycle models.

Product Overview

Professional Handlebar Control Assembly

This motorcycle handlebar switch assembly is designed as a comprehensive control solution for various motorcycle models. It integrates essential functions including brake lever operation, turn signal activation, headlight control, and an emergency kill switch into a single, durable unit. Featuring a pre-wired harness with multi-pin connectors, this assembly ensures a streamlined and efficient installation process for repair or replacement needs.
