

Motorcycle Headlight Assembly with Auxiliary Lights

This motorcycle headlight assembly features multiple light sources for improved visibility. It includes a smaller auxiliary light and two larger lights, housed in a durable black plastic casing.

Product Overview

Enhanced Visibility and Durability

This motorcycle headlight assembly is engineered for aftermarket installation, offering a robust replacement solution for riders seeking improved illumination. Featuring a multi-source light design, the unit integrates a primary headlight system with auxiliary lighting for enhanced road visibility. The durable dark housing is constructed from high-quality, weather-resistant plastic to withstand demanding riding conditions.
