

Motorcycle Headlight Assembly with Incandescent Bulb

This motorcycle headlight assembly is designed for various applications. It features a rectangular lens with vertical prisms for optimal light distribution and reliable illumination.

Product Overview

High-Quality Motorcycle Headlight Assembly

This motorcycle headlight assembly is engineered for durability and consistent performance, featuring a high-quality glass lens with hardening treatment for superior clarity and aging resistance. The unit is designed with a 0.8mm chrome-plated frame and a robust ABS housing, ensuring longevity and reliable operation. With a luminous intensity of 800cd/m² and a standardized light line, this assembly provides excellent visibility and safe illumination for various motorcycle models.

Technical Specifications

Working Voltage

6 V

Voltage

Luminous Intensity	800 cd/m ²
Bulb Lifespan	150 hours

Materials & Construction

Materials Used	PMMA, ABS, PP, Glass, Chromium
Frame Specifications	0.8mm plating chromium, 7.5 to 8.0 coating grade

Quality & Standards

Quality Control Protocols

- 100% incoming quality control
- 100% mass factory inspection
- Production according to technical standard drawings

Logistics & Packing

Available Packing Options

Neutral packing • Color box • Customized box
