

Motorcycle Headlight Assembly with Incandescent Lamp

This motorcycle headlight assembly features a clear lens for the main headlight and amber lenses for the turn signals. The main headlight uses an incandescent light source and operates at 6V DC.

Product Overview

Motorcycle Headlight Assembly

This motorcycle headlight assembly is designed as a reliable replacement component featuring an incandescent light source. The unit includes a durable housing with a clear main lens and integrated amber turn signals, built to standard technical specifications. It is engineered for consistent performance and ease of installation, making it a suitable spare part for various motorcycle models.

Technical Specifications

Working Voltage	6 V DC
Luminous Intensity	800 cd/m ²
Light Source	Incandescent

Materials & Construction

Lens Material	PMMA
Reflector Material	PP
Housing Material	ABS

Quality & Compliance

Quality Assurance

- 100% incoming quality control
- 100% mass factory inspection
- Production according to technical standard drawings

Packaging

Available Packaging	Neutral packing, Color box
